**To Whom It May Concern**

This is to acknowledge the outstanding contribution of Aryaman Bhatt, a student of SRM Institute of Science and Technology, who has successfully developed an interactive game designed to assist children with autism in improving their cognitive and motor skills.

Aryaman personally visited our Apple Valley Special School to implement and test the game with our students. His initiative demonstrated a deep understanding of the challenges faced by children with autism and provided an engaging and effective learning tool. Our teachers and therapists observed notable improvements in student engagement and responsiveness while using the game.

We appreciate Aryaman's dedication, innovation, and willingness to create solutions that cater to neurodivergent children. His project reflects a strong commitment to making a positive social impact, and we believe it has great potential for further development.

We highly recommend Aryaman for any future opportunities related to technology-driven social initiatives and look forward to his continued success in this field.

Sincerely,

Thiriambika J
